- An app that allows users to search musical concerts happening within your city and provide ticket prices and options to buy.
- Responsibilities: Front-End developer and setting up API call
- Technologies used: HTML, CSS, Javascript, Bootstrap, Ticketmaster and audioBD API

EXPERIENCE

Histology Trainee

2016 - Present

Department of Anatomic Pathology, UW Medical Center, Seattle, WA

Utilized strong attention to detail skill to section surgically removed organs and autopsy into clinical slides for disease diagnosis. Monitored the quality for each specimen slides and take corrective actions to identify and solve any potential error that may cause misdiagnosis

Accomplishments:

- Performed quality controls on 1000+ clinical slides on a daily basis with minimal error; hastening patient diagnosis and minimizes request for recuts.
- Played a major part in reinventing Histology lab metrics and documentations for easier access to patients information.

EDUCATION

University of Washington, Seattle, WA

Feb 2020 -Present

Certificate - Full-Stack Web Development

University of Washington, Seattle, WA

Sep 2013 - Mar 2016

Bachelor of Science - Biochemistry
